Pet Sliding Door Conversion Kit

The really simple conversion kit for your sliding patio door. And your pet

Woof...Meow... The Great Outdoors!

A Pet Door That Makes Sense

The patio door conversion kit is a sensibly designed, custom built, weather-tight panel that fits your existing sliding glass door. While the pet door keeps the weather out, you still have full use of the sliding door, latch and screen. Pets love the freedom. And so will you.

How You Benefit

Simple – a glass professional replaces the original glass in less than an hour

The best patio door pet conversion available

Allows your sliding glass door to slide and lock normally

No interference with screen function

No glass cutting or frame replacement

Custom manufactured conversion kit that uses your existing frame

Renowned energy-efficient Endura Flap

Pets able to access the "great outdoors" on their own

Better looking and more functional than inefficient "pet panels"

Dual pane glass, magnetic seal Endura Flap, no air gaps

Security cover included for extra peace of mind

Easy conversion back to original door if selling home

An Exceptionally Simple Pet Door Solution

High Quality You Expect

Built of the highest quality material, each pet door conversion kit features gas-filled, and double-pane safety glass, with options for LowE-272, or LowE-366 and for gray or bronze tint.

The Endura Flap Advantage

Each pet door conversion kit features a best-in-the-business Endura Flap, with a continuous magnetic contact, pivot rod for full swing, and unique bellows on the flap edges to ensure an energy efficient seal. The flap is UV resistant, flexible to -40°F and has been tested to withstand winds up to 50 miles per hour and more by easily adding edge magnets.

Pet Freedom. Your Freedom.

Pets go out and back in when they want to. And let's not forget the energy savings over continual opening and closing the sliding door for your pet in the cold of winter or heat of summer.

The Installation Process

Professional installation by your local glass shop. Owner selects the pet door flap opening size. Professional measures existing IGU for thickness, width and height. quickly builds the conversion kit and ships it to the professional installer, who installs the glass and conversion kit like a normal re-glaze, using existing stops, setting blocks and glazing tape. Door glass and track is then cleaned, adjusted and ready for use in about an hour.
